KNOW YOUR BOOK

Please be aware that the Library Staff does not know the Required or Recommended Textbooks for all ND and Nutrition Courses this Quarter. And they do not have access to any of the courses on canvas and/or all the course syllabi. So when seeking Library Staff assistance in locating a Textbook, please know the book title and author; providing the course name and instructor can be useful at times. If you are unsure of the textbook you are coming to locate, having the course syllabi open on your electronic device will be most helpful to the staff.

LWW Health Library

The **LWW Health Library** is a subscription-based resource, produced by the Wolters Kluwer / Lippincott Williams & Wilkins publishing company, that features leading medical content, plus multimedia, self-assessment, algorithms, case studies, and more. Of course, here at Sonoran University, it is most popular for the wealth of Ebooks content. To be clear, understand that only a select few medical books published strictly by the LWW publishing company will be found in this particular Database.

On the Library's MySonoran site, you will find the link to the LWW Health Library first in the "A-Z List of Library Resources" on the "Library Resources Databases Holdings" page. Be sure to click on it to link out to the Library LWW account page. It will take you right to the LWW Library of Medical Textbooks, many of which are required and/or recommended for your Basic Sciences, CLPR and various other Sonoran University Courses.

The screenshot displays the LWW Health Library website. At the top, the logo for LWW Health Library and Wolters Kluwer is visible. RECOMMENDED BROWSER

It is likely you have a preferred Internet Browser that you utilize daily. However, it is important to be aware that not all web browsers are created the same. And these differences can be significant in how they affect the functionality and appearance of websites. As a result, you may experience issues when accessing the Library's databases and other online resources depending on which Browser you regularly use. If you are having problems accessing the Library's databases and resources, you may wish to explore using a different Browser. The Library has found, and recommends, **Google Chrome** to be the most consistent overall in successfully utilizing the many various Library databases and online resources. Though not always the most popular, please consider using this particular Browser for the Sonoran Library resources.

Meanwhile, on occasion, you may still experience issues with accessing your Library account and databases. Some troubleshooting tips that the Library recommends can be related to any of your Browsers and their settings. Remember to regularly clear the Cache in your Browser. Regularly rebooting, closing and reopening, your Browser can also be significant. Additionally, sometimes you will need to turn on your Pop-Up feature. And sometimes, making sure your Browser is current can be a factor. Be sure that your computer is regularly successfully updating, and often just rebooting your computer completely can make a big difference.

Please consider and make sure to try all of these troubleshooting tips before contacting the Library about account and database access issues.
